

## Nady Systems TRM-6 Tube Ribbon Microphone

*Nov 1, 2007 12:00 PM, By Karen Stackpole*

Nady Systems' latest offering in accessibly priced studio microphones is the TRM-6 Tube Ribbon Microphone (\$499.95), a hybrid that combines a classic ribbon design with an internal tube preamp. The 12AX7A triode provides higher output levels than you would get from a standard ribbon mic, allowing the TRM-6 to be used with any external preamp.

I received a pair of TRM-6s for testing. Each mic came in a vinyl zippered pouch, neatly packaged in its own lockable, foam-padded aluminum flight case. Also included was a TMPS-6 remote power supply, an AC power cord, an elastic suspension shockmount, a foam windscreen, and a 33-foot cable with 7-pin XLR plug to connect the mic to its power supply.

The Nady TRM-6 is an active ribbon microphone that uses a tube in the output circuit.
